Box No. I

Basis of this opinion

1. With regard to the **language**, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.  
☐ This opinion has been established on the basis of a translation from the original language into the following language  
\_\_\_\_\_, which is the language of a translation furnished for the purposes of international search (under Rule 12.3 and 23.1(b)).
2. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
  - a. type of material  
☐ a sequence listing  
☐ table(s) related to the sequence listing
  - b. format of material  
☐ in written format  
☐ in computer readable form
  - c. time of filing/furnishing  
☐ contained in the international application as filed.  
☐ filed together with the international application in computer readable form.  
☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

Discussion:

Documents 1-5 cited in the ISR pertain to the "information processing system comprising a terminal operated by a user, a first parent device that provides resources, a second parent device that stores the personal information of the user, and a value device that manages electronic values" as described in claim 1 of the present application. However, they do not describe the point that the first parent device comprises "a transfer notification reception means that receives a transfer notification from the value device indicating that an electronic value (a value corresponding to the supply of said resources) has been transferred from the second parent device to the first parent device, and a utilization right issuance means that issues the utilization right to the second parent device in response to the transfer notification" nor do they describe the point that the second parent device comprises "an electronic value transfer request means that in response to a signal requesting the resources sent from the terminal device asks the value device for transfer of the electronic value to the first parent device, a second utilization right acquisition means that acquires the utilization right issued by the first parent device in response to transfer of said electronic value, and a utilization right supply means that supplies the utilization right obtained at the second utilization right acquisition means to the terminal." Also, this is not obvious to a person skilled in the art.
